ACKNOWLEDGMENTS

I would like to express the deepest appreciation to my committee chair, Professor Godfrey Sykes Irvine, who has the attitude and the substance of a genius; he continually and convincingly conveyed a spirit of adventure in regard to research and scholarship, and an excitement in regard to teaching. Without his guidance and persistent help this dissertation would not have been possible.

I would like to thank my committee members, Professor M. Chipangaya Tindcyla and Professor Mamadouh Oragne, whose work demonstrated to me that concern for global affairs supported by an “engagement” in comparative literature and modern technology should always transcend academia and provide a quest for our times.

In addition, a thank you to Professor V. Milacic of Western University, who introduced me to Linguistics, and whose enthusiasm for the “underlying structures” had lasting effect.

I thank the University of Chicago Press for permission to include copyrighted photographs as part of my thesis/dissertation. I also thank Springer Verlag for permission to include Chapter Five of my dissertation, which was originally published in Linguistics Journal. Financial support was provided by the University of California, Irvine, NSF Grant DEB-822762 and a MacArthur predoctoral fellowship in International Peace and Security granted by the Social Science Research Council.
